DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-7 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The instant claims 1-7 as set forth do not adequately disclose what the phrase "a few A to a few μm ". Applicants only disclose 2000 A in their examples, which does not adequately support what the phrase "a few" means. Typically a few means one or two. Since "a few" has not been defined, the claimed subject matter does not appear to enable one skilled in the art on how to make and or use the instant invention as set forth.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Takeuchi et al (6458487).

Takeuchi et al discloses a positive active material of a metal oxide having a cover layer of a metal oxide is formed on the positive active material in a non aqueous secondary cell. See abstract. Col. 11, lines 22-67 disclose that the cover layer is porous so that the battery reaction takes place more easily and the negative electrode is disclosed to be of a carbon material.

The prior art of Takeuchi et al anticipates the applicants' instant invention as set forth in the instant claims as set forth above.

Allowable Subject Matter

5. Claims 2-6 are allowable over the prior art of record.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to teach and/or suggest a method of fabricating the metal oxide electrode as set forth, wherein the coated metal oxide material is stabilized under a vacuum condition.

Art Unit: 1746

7. Claim 2 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, first paragraph, set forth in this Office action.

8. Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
